QUESTION 2.

// FIRST UNIQUE CHARACTER IN A STRING

```cpp
class Solution {
public:
    int firstUniqChar(string s) {
        map<char,int>hmap;
        for(int i{};i<s.size();i++){
            hmap[s[i]]++;
        }
        for(int i{};i<s.size();i++){
            if(hmap[s[i]]==1)
            return i;
        }
        return -1;
    }
};
```
